TechniStone®
A WILSONART COMPANY

Technistone Introduces New Products

Inspired by nature and shaped by the evolving character of contemporary interiors, the new Technistone designs bring fresh depth, refined movement and a more nuanced material expression to the TechniStone® portfolio.

Balancing enduring performance with visual sophistication, they are created to elevate everyday spaces through surfaces that feel timeless, composed and distinctly premium.

About New Arrivals

The new collection celebrates the aesthetics of stone through a diverse range of surfaces, colours and structures. Rather than following a single design direction, we wanted to explore different interpretations of stone—from calm, understated surfaces to more expressive designs rich in depth and detail.

Recent years have seen a growing preference for quartzites and stones with warmer colour palettes. Cream, sand and golden tones are increasingly finding their way into contemporary interiors, alongside more nuanced patterns and structures. At the same time, there is growing interest in materials with greater depth and complexity that can bring character to a space without overwhelming it.

These influences are reflected throughout the collection. It includes new designs that build on the Noble Collection, known for its subtle, fine veining and balanced appearance. These surfaces remain among the most popular choices in our portfolio thanks to their versatility, ease of application across larger areas and ability to integrate naturally into a wide range of interior styles.

Alongside them, we have introduced bolder designs inspired by quartzites and stones with richer, more intricate structures. Composed of multiple layers of pattern and detail, these surfaces reveal new nuances over time and offer architects and designers greater freedom to work with the material as a defining element of a project.

The result is a collection ranging from elegant dark surfaces through warm beige and golden tones to light designs accented by delicate golden veining. While each design has its own character, they are united by a common goal: to capture the depth, diversity and enduring appeal of stone.

Today, the spaces where we cook, dine, work, relax and gather are more connected than ever. As interiors become increasingly fluid and multifunctional, materials play a key role in shaping their character and continuity. Stone is uniquely suited to this task, bringing character, permanence and a sense of connection across the spaces where everyday life unfolds.

Advantages and Dimensions of TechniStone®

Slab dimensions

Jumbo 155: 3 185 mm × 1 550 mm = 4, 94 m²
Jumbo 165: 3 300 mm × 1 650 mm = 5, 45 m²

Slab thickness and weight

SLAB THICKNESS	WEIGHT PER m²	WEIGHT OF THE SLAB
Jumbo 155 size: 20 mm	50 kg	245 kg
Jumbo 155 size: 30 mm	75 kg	367 kg
Jumbo 165 size: 20 mm	50 kg	268 kg

Emperador Beige

Polished, Matt

Rich in detail yet calm in its overall expression, Emperador Beige brings a sense of depth to interiors built on soft tones, balanced proportions and a thoughtful material palette.

Its beige base is shaped by a complex mineral structure that gives the design a naturally layered appearance, while white and delicate golden lines move gently across the surface, adding lightness and refinement. It sits naturally within contemporary spaces, calm minimal interiors and modern classic settings, where it helps connect individual elements into a harmonious whole.

Perlado Bronze

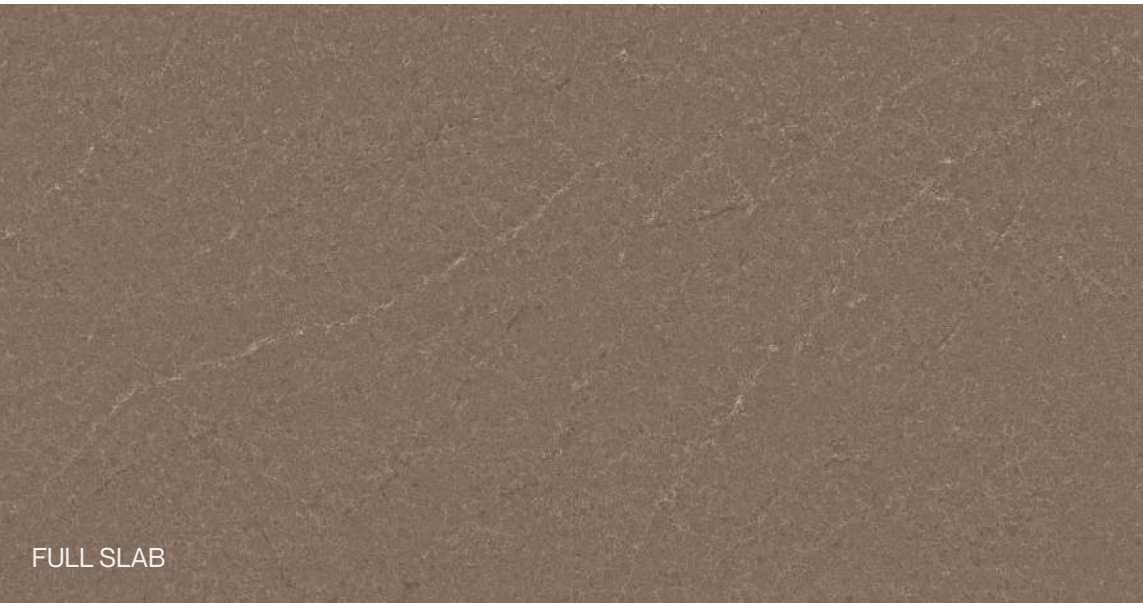

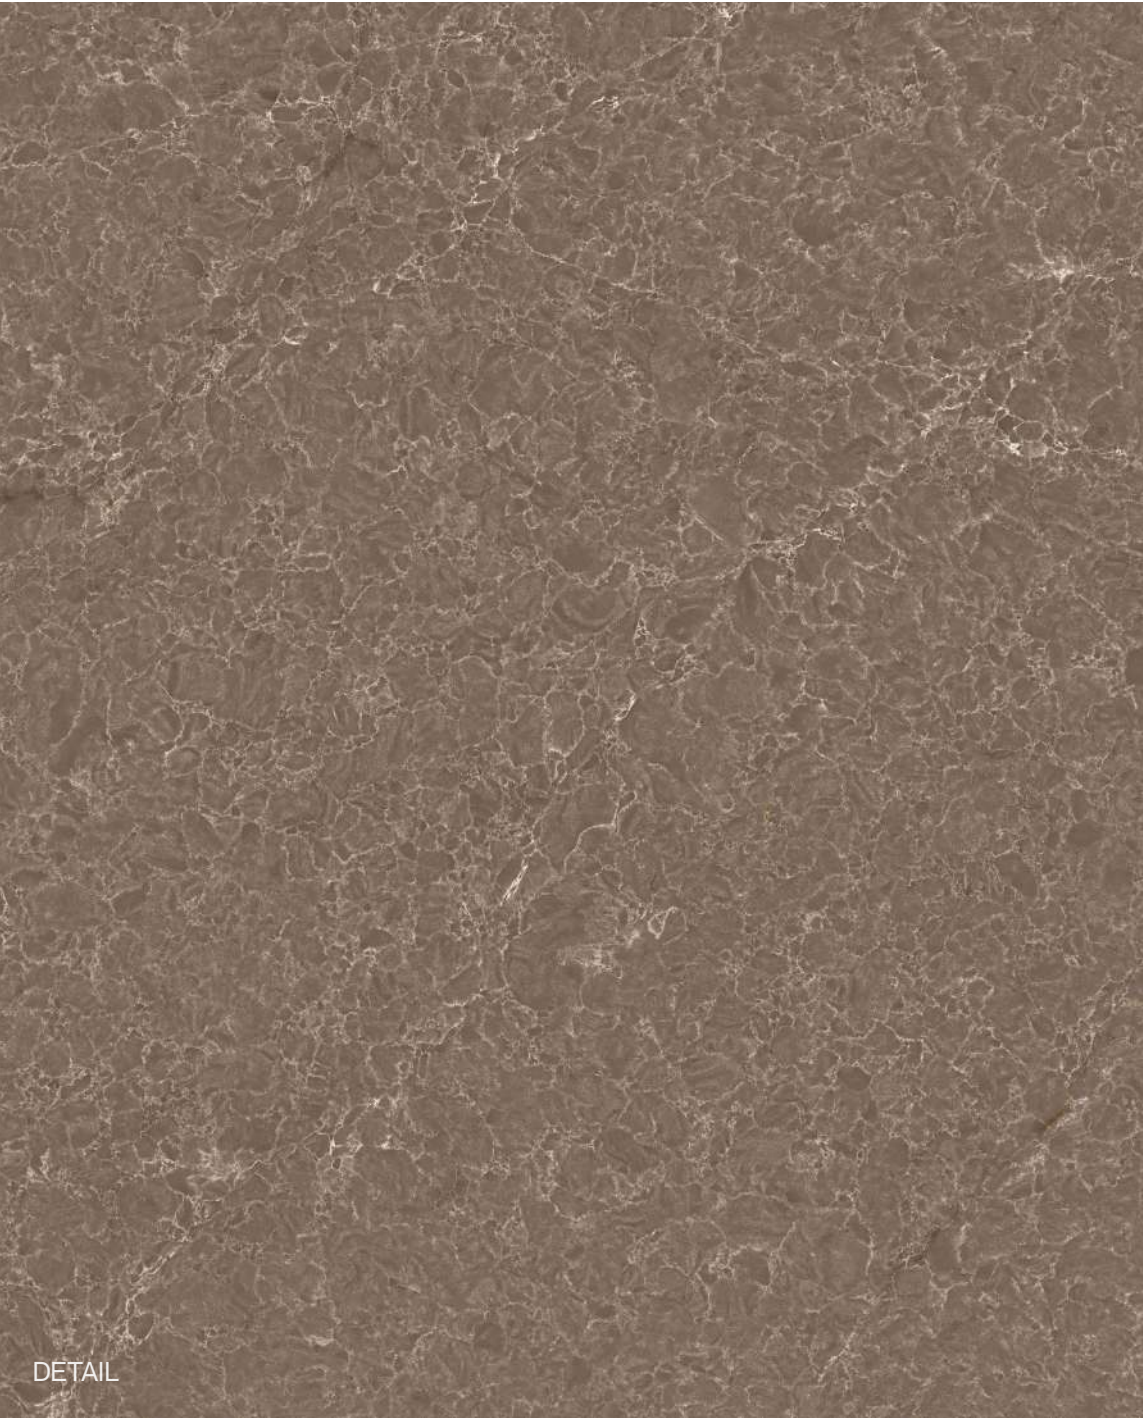

Polished, Matt

Perlado Bronze stands out through its mocha-bronze surface, subtle mineral patterning and warm undertones. Long brown and ivory veins move softly across the design, bringing depth, rhythm and a quietly luxurious expression.

It comes into its own in interiors built on muted colours and a thoughtful approach to materials, where harmony, proportion and detail play a defining role. Its character naturally complements contemporary minimalism, warm minimalism and modern classic interiors.

Light and smoked wood, matte surfaces, decorative plaster and accents in bronze, brass or brushed metal underline its sophistication, while soft textiles and natural shades enhance its calm and confident presence.

Dynasty White

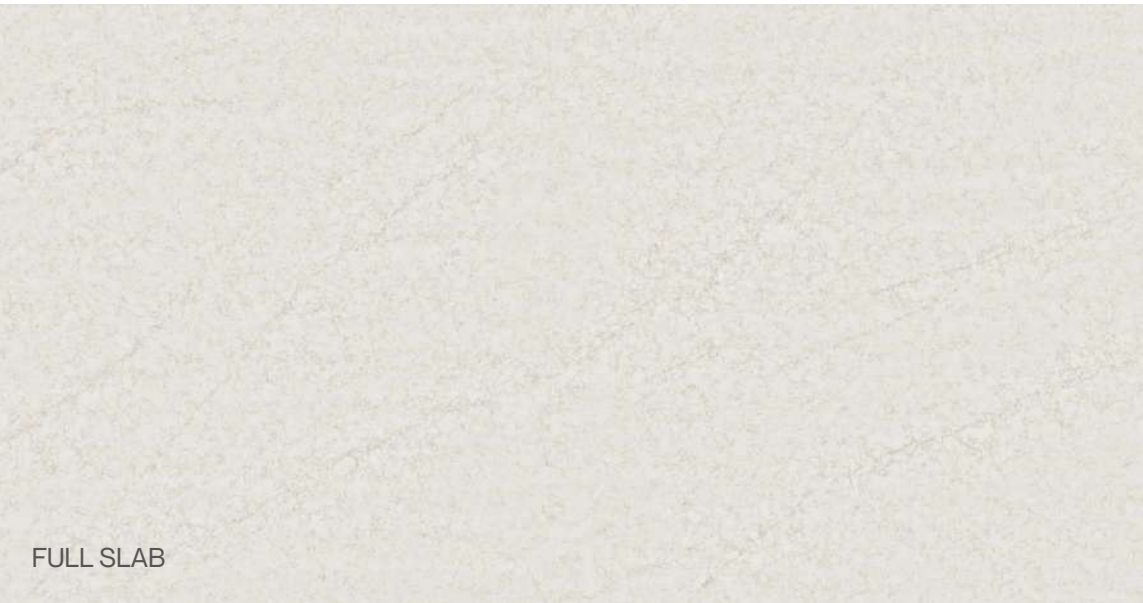

Polished, Matt

In interiors where light, proportion and material balance define the atmosphere, Dynasty White brings texture, warmth and quiet richness. Its white surface is shaped by a fine, dense mineral structure, while beige to golden brown veins soften its clarity with gentle movement and natural depth.

Elegant and composed, it works especially well in refined contemporary spaces as well as softer minimalist concepts, where it adds subtle complexity without losing a clean architectural expression.

Natural oak, light woods, brushed metals and matte finishes highlight its layered character with ease. Paired with soft textiles, warm neutrals and textured surfaces, Dynasty White helps create interiors that feel calm, cohesive and naturally lived in.

Nuova Crema

Polished, Matt

Nuova Crema has a quiet presence that feels instantly elevated. Its ivory surface is refined by a fine, regular mineral structure, while long tone-on-tone lines move across the slab with a soft linear cadence that brings order, lightness and continuity.

There is a natural sophistication to this design. It does not rely on contrast or ornament, but on proportion, texture and a warm, controlled palette. In interiors shaped by calm luxury, it creates an atmosphere that feels serene, polished and enduring.

Paired with darker wood, champagne bronze, light fine skim coat walls, clear glass, natural textiles and warm neutral tones, Nuova Crema reveals its most distinctive character. The result is timeless and elegant, with a quiet warmth that gives the entire interior a composed and considered feel.

Perla Champagne

Polished, Matt

Light in expression and composed in character, Perla Champagne brings clarity and warmth to interiors shaped by clean lines, natural light and a restrained material palette. Its white surface is enriched by a champagne-toned mineral structure and soft warm nuances, while a dominant vein diffuses into finer surrounding veining to create a pattern that feels fluid, balanced and visually cohesive.

Rather than relying on sharp contrast, it works through tonal transitions and a controlled sense of depth. It pairs naturally with warm neutrals, light wall finishes, brushed metals, glass and softly textured materials, bringing a calm and refined presence to the space.

DETAIL

FULL SLAB

Venato Oro

Polished, Matt

With the quiet elegance of light cream tones and the layered character of fine limestone, Venato Oro brings a natural sense of ease to the interior. Its refined mineral structure is crossed by thin golden veins that introduce softness, light and a balanced visual rhythm.

Calm and cultivated in expression, it suits spaces shaped by natural light, subtle detail and a harmony of materials. In both contemporary interiors and more classic compositions, it creates an atmosphere that feels composed, warm and easy to live with. Light wood, brushed metals, linen textiles and softly textured surfaces such as plaster or travertine allow its delicate pattern to settle naturally into the space, bringing lightness, warmth and an effortless sense of harmony.

DETAIL

FULL SLAB

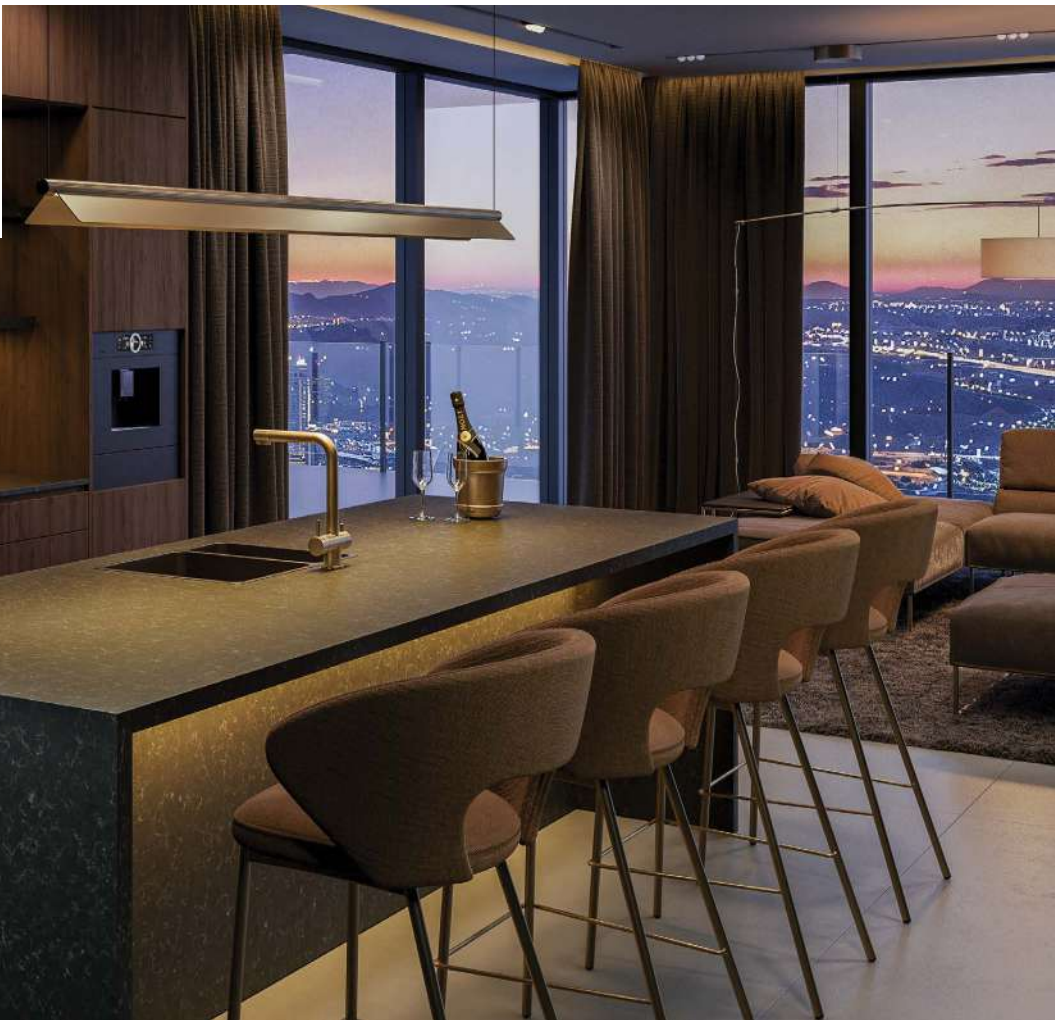

Noble Arctic Night

Polished, Matt

Bold yet controlled, Noble Arctic Night brings striking contrast and a strong architectural presence to the interior. Its deep black surface is refined by a fine mineral structure that gives the design clarity and depth, while white and golden veins appear in a relatively regular rhythm, creating precise contrast and a clear visual order.

It suits spaces shaped by clean lines, strong material definition and a deliberate balance between dark surfaces and lighter elements. In these compositions, it draws focus without overwhelming the whole. Dark wood, black metal, brushed finishes and softly textured materials underline its contrast while keeping the atmosphere refined, balanced and coherent.

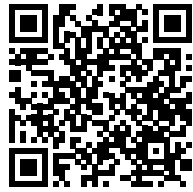

DETAIL

FULL SLAB

Noble Arco Gold

Polished, Matt

Noble Arco Gold builds on the timeless character of Noble Arco with a warmer, more nuanced expression. Its light surface is enriched by a refined mineral structure and warm undertones, while brown-gold veins bring added depth and a natural sense of softness.

There is a natural ease to this design that feels both cultivated and familiar. It suits interiors where clean lines meet layered materials, and where elegance is shaped by continuity, calm and everyday comfort.

Natural wood, brushed metals, textured plaster and muted textiles bring out its warmth with quiet confidence, allowing the design to settle naturally into a balanced and inviting space.

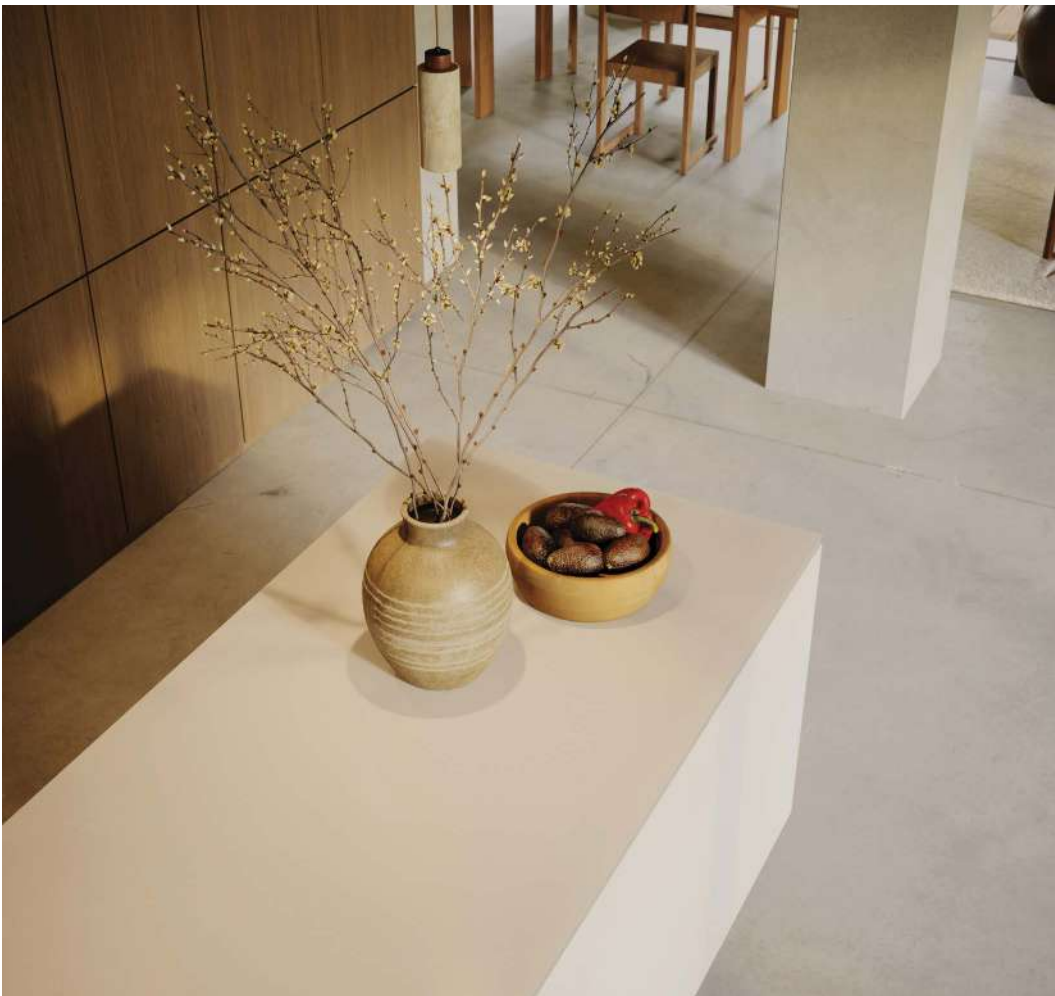

Noble Supreme Brass

Polished, Matt

Soft, calm and quietly refined, Noble Supreme Brass brings a gentle warmth to interiors shaped by light, texture and balance. Its very light base is defined by a subtle structure and delicate brass veining, creating a surface that works through nuance rather than contrast.

The fine mineral character gives the design softness and clarity, while its warm tonal expression supports a composed and cultivated atmosphere. It pairs naturally with light fine skim coat walls, dark wood, ceramics and natural textiles, where it becomes part of a calm and balanced material composition.

Calacatta Aurelia

Polished

Expressive veining gives Calacatta Aurelia a sense of movement, depth and quiet luxury. Its calm white base explores a warmer, more nuanced side of the Calacatta aesthetic, while the pattern unfolds with a natural sense of drama. It is distinctive enough to define the space, yet balanced enough to remain composed.

The result is a surface that brings together warmth, fluidity and visual harmony in a way that feels refined and enduring. Paired with walnut wood, brass or gold-toned accents, glass and a palette of warm neutrals, Calacatta Aurelia reveals its full character and creates an interior atmosphere that feels elevated, polished and quietly opulent.

DETAIL

FULL SLAB

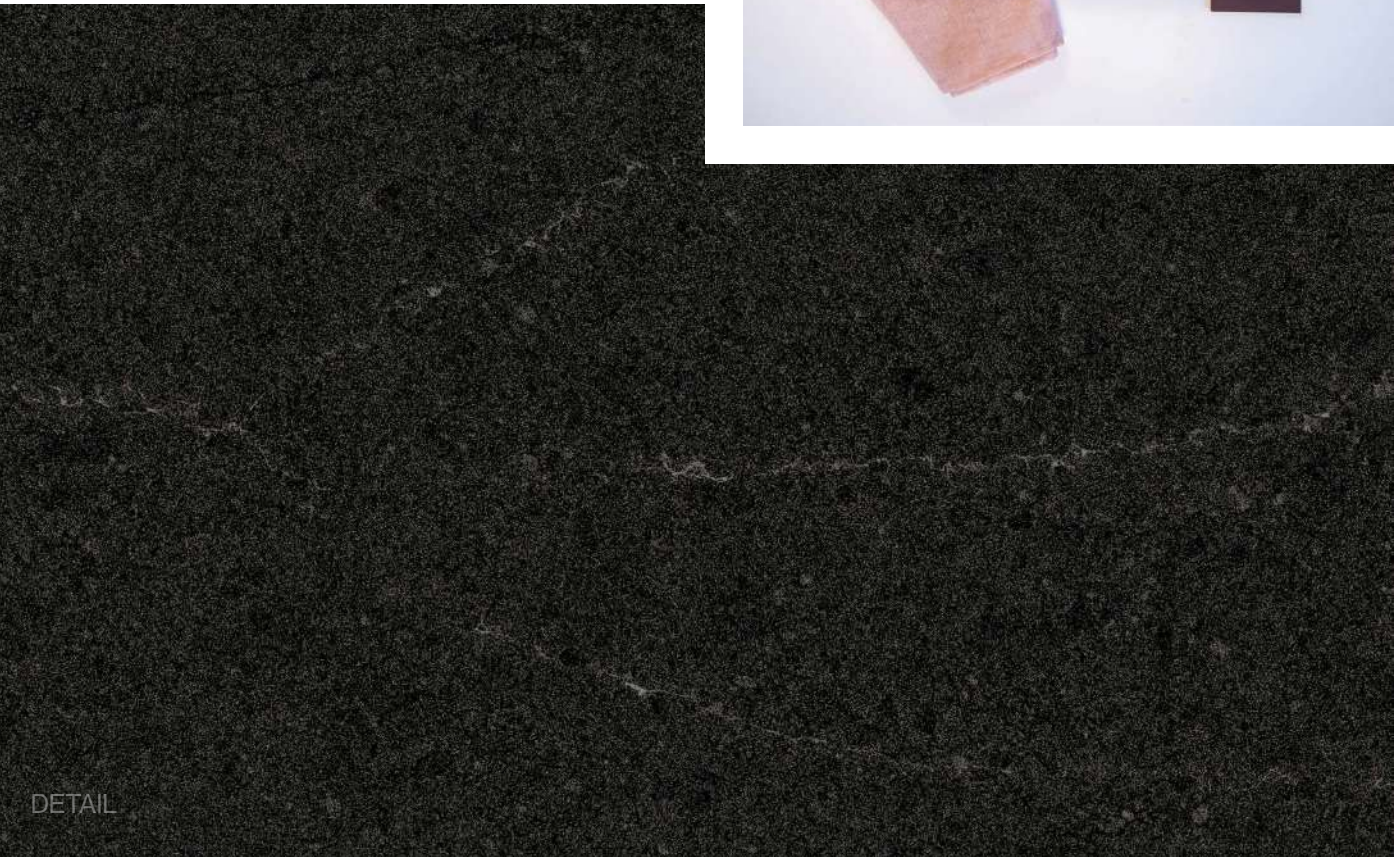

Nova Serrana

Polished, Matt

Dark, layered and quietly distinctive, Nova Serrana brings a grounded elegance to the interior. Its charcoal-grey surface recalls the character of oiled soapstone, enriched by a mottled background that gives the design natural depth and a softly weathered expression.

Long, thin veins in deep black and softly fading white move across the slab with a calm rhythm, creating a composition that feels balanced, tactile and visually composed. Nova Serrana suits interiors shaped by darker tones, textured materials and a thoughtful sense of contrast, where it can bring depth without heaviness.

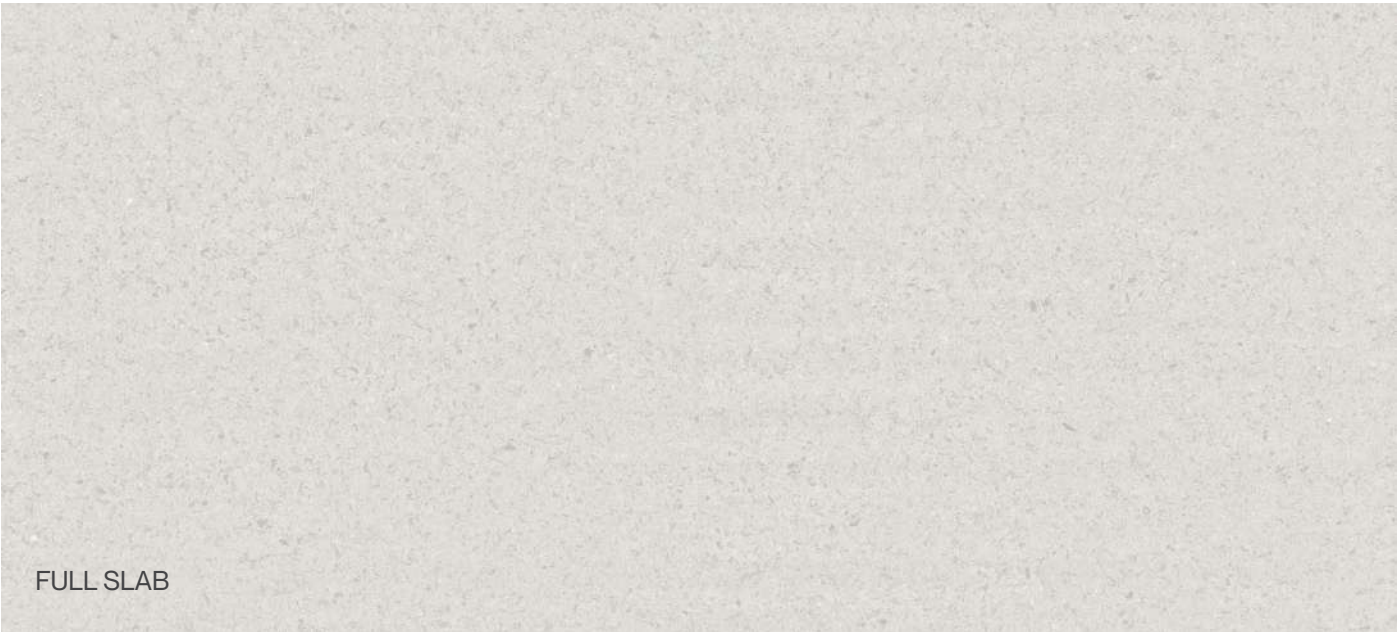

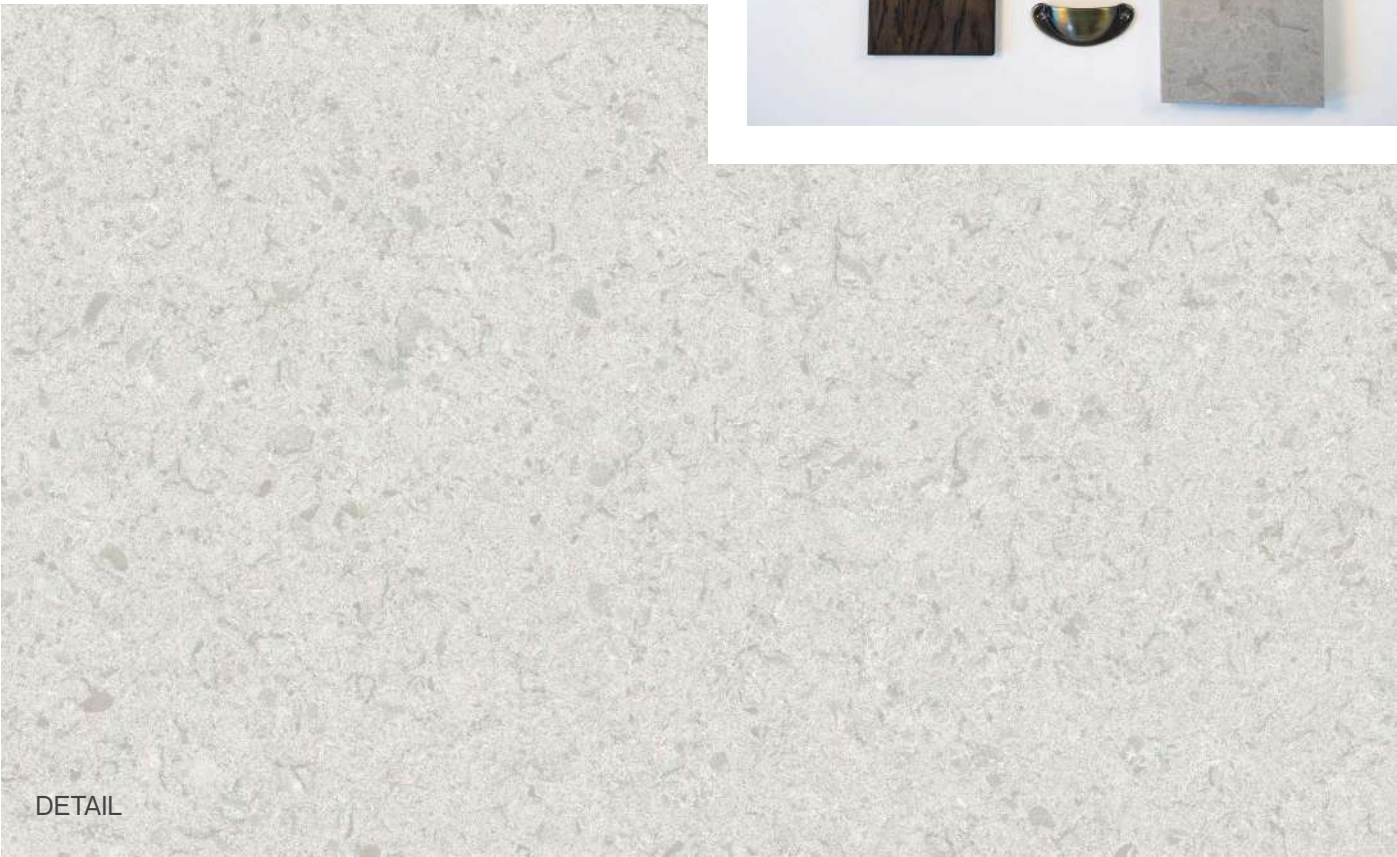

Yucca Calm

Polished, Matt

Gentle in expression and understated in character, Yucca Calm offers a softer interpretation of Wild Yucca. Its light surface is defined by a fine mineral structure and softly dispersed mineral inclusions that give the design texture, nuance and a natural sense of ease.

The overall composition feels calm and balanced, making it well suited to interiors where light, simplicity and material harmony shape the atmosphere. Rather than drawing attention through contrast, Yucca Calm works through subtle detail and a quiet visual rhythm and helping create spaces that feel airy, composed and effortlessly welcoming.

Where new becomes timeless

La Natura Collection

What begins in nature continues in design. The inspiration behind this year's new products is rooted in the same quiet richness that shaped La Natura — in the depth of stone, the softness of tonal transitions and the effortless elegance of organic patterns. It is a material language that feels calm, authentic and enduring.

That is why this is also a moment to return to La Natura. The collection expresses a refined connection between interior and nature, translating the beauty of stone into surfaces with greater realism, delicate veining, and a timeless sense of harmony. Its character remains just as relevant and compelling today.

Seen together, this year's designs and the La Natura collection form a natural continuation — a shared expression of Technistone's sensitivity to material, atmosphere and contemporary living. Crafted from carefully selected natural raw materials and designed for lasting beauty, TechniStone® brings together emotional depth and everyday performance in a way that feels elevated, effortless and enduring.

Taj Mahal Gold

Elysian Gold
Polished, Matt

Duna Beige
Polished

Badal Grey
Polished

Taj Mahal Gold

Polished, Matt

Taj Mahal Gold is inspired by the fabled marble of the Taj Mahal. Its sophisticated elegance and warm tone will find a place in the most luxurious projects. Sandy beige and cream colors, together with golden undertones, create an understated, yet still noticeable texture that has depth and a graceful feel.

Taj Mahal Gold's look recalls the golden era of art deco, when luxurious materials were enhanced by perfect proportions and stylized details. It goes perfectly with bronze, glass, stucco, and luxurious textiles. It stands out in interiors where classicism meets contemporary design, whether it is with an elegant countertop, wall tiling, or luxurious bathroom furnishings.

Mistral White

Polished, Matt

Mistral White is inspired by white marble and perfectly reflects the philosophy of New Nordic Design. Cleanlines, a functional aesthetic, and harmonious colors — these are the characteristics that Mistral White brings to a contemporary interior.

Mistral White's fine, creamy-white background is streaked with unobtrusive brown veins, which provide it with depth and natural structure. The design's warm tone gives a space a feeling of natural calm and balance. Mistral White harmonizes well with oiled oak, white stucco, and natural green. In combination with pastel shades, it adds refinement to an interior, while with darker materials it creates a sophisticated contrast. Mistral White is the ideal choice for those who want to bring lightness and serenity into their interior.

Elysian Gold

Polished, Matt

Elysian Gold captures your attention at first glance. This premium engineered stone design is inspired by translucent natural quartzite. It blends a fine crystalline structure with golden, reddish-brown, and light grey veins. Thanks to its visual depth and subtle contrasts, it makes a striking yet balanced impression. It's ideal for use in interiors that feature bold combinations of materials and an eclectic style.

Elysian Gold shines in the context of modern glamour, where it stands out in combination with bronze and gold accessories and saturated complementary colors on walls or furniture.

Duna Beige

Polished

Duna Beige brings the peace and harmony of natural materials into an interior. Its refined pattern and sandy tones are reminiscent of the eternal beauty of travertine, which in the form of engineered stone offers greater durability and minimal need for maintenance.

The aesthetic of Duna Beige resonates with the principles of Quiet Luxury — luxury that doesn't rely on ostentation, but rather on well-chosen materials and subtle sophistication. It combines well with brushed wood, linen textiles, and clay stucco. It succeeds in interiors where the emphasis is on natural light and harmony of materials and detail. Its layered, natural structure and subtle coloration create a material that is unobtrusive yet sophisticated.

Badal Grey

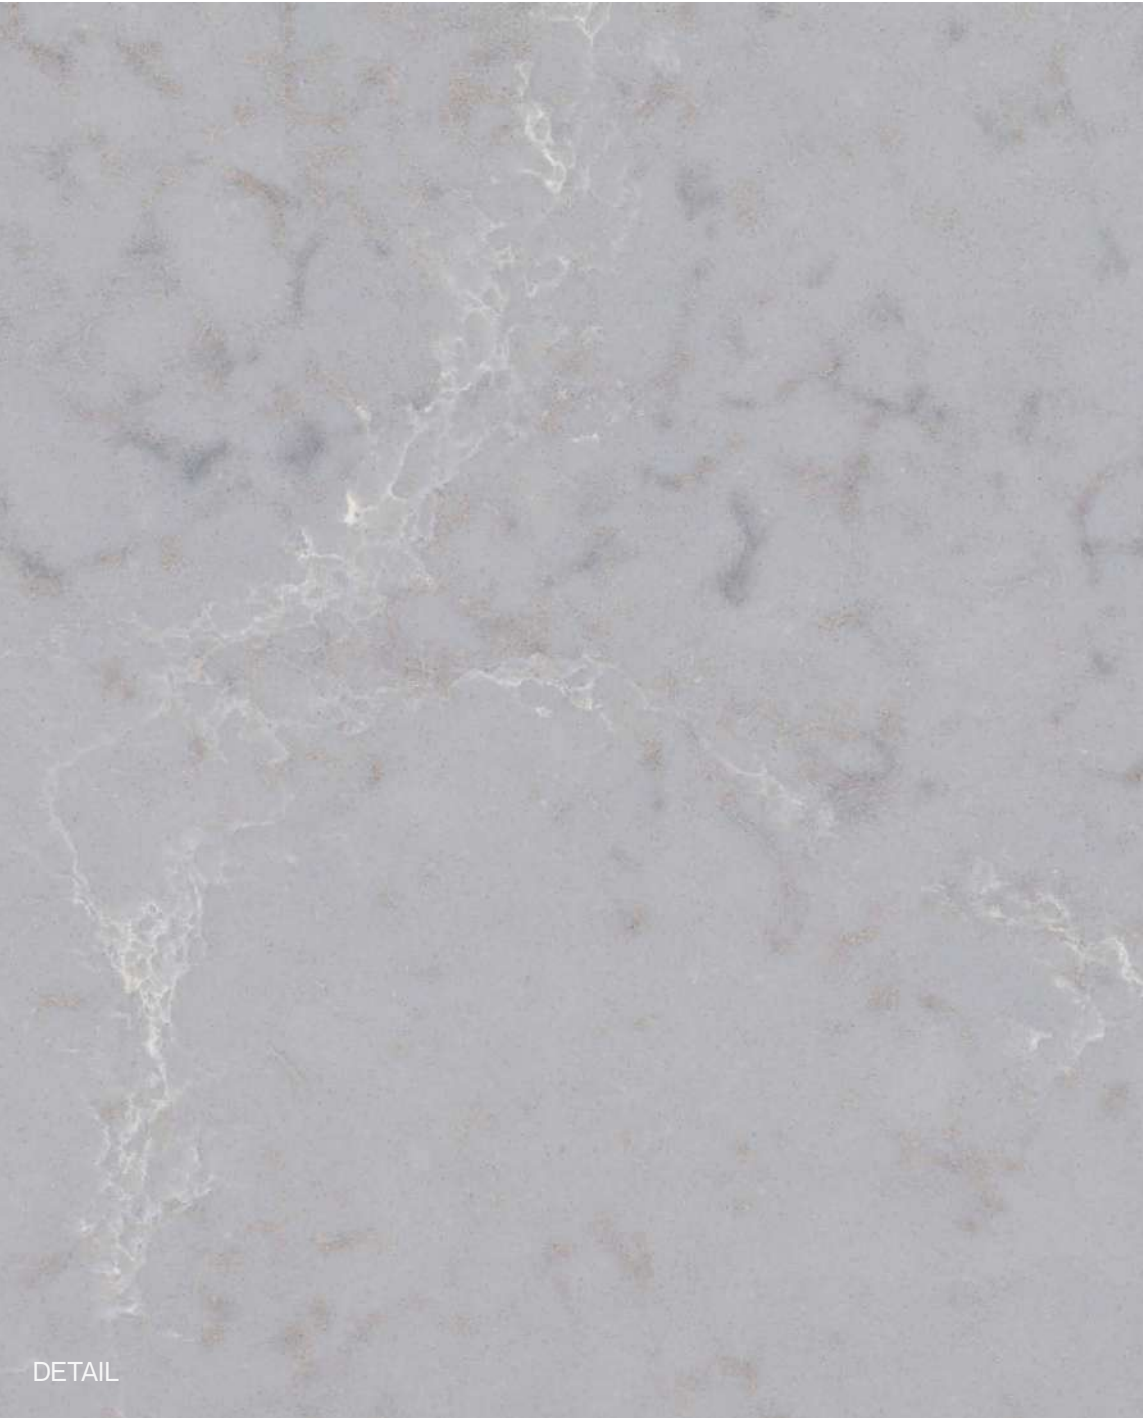

Polished

Badal Grey combines the rawness of concrete with the refined elegance of marble. The grey background of this design is streaked by white and grey-brown veins that give the material depth and emphasize its timeless character.

Badal Grey works perfectly in bright light or shadow, and complements anthracite, light grey, and off-white shades. It can also support distinctive color accents if more daring contrast is desired in an interior.

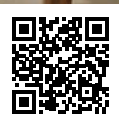

Badal Grey is for those who believe that there is strength in simplicity.
